THE WEIR SELF-SEALING --- STONE FRUIT JARS

These jars have been on the market for a number of years, and have given the best of satisfaction. They are a perfect SELF-SEALING JAR; are practically unbreakable, will exclude the light as well as air; and you can tell in advance whether fruit will keep. The jar can be opened and closed by a child without burning of fingers or scalding of hands. No slivers of glass can get into the fruit. No metal comes in contact with the fruit. No corrosive substance can gather in the lids or threads of the jar. The most perfect sanitary jar made.

THESE JARS make an excellent container for milk and butter, as they can be placed in the refrigerator and the contents of the jar are absolutely protected from taint.

Y.W.C.A. CLASSES BEGIN NEXT WEEK

The Y. W. C. A. classes for the coming year will start up next week and there is every indication that success will mark the work.

Mrs. Walter Marr, a graduate of Smith College, and an advanced student in the Emerson College of Oratory of Boston, will teach a class in elocution. The class will begin the second week in October, the exact date to be named later. Terms will be \$2 for ten lessons.

Miss Edith King will be at the head of the class in pyrography and Miss Helen Keany will teach the class in stenography for which the terms will be \$5 a month for eight lessons and \$10 for twenty lessons. Private pupils can be arranged for by consultation with the secretary.

A class in lace, embroidery and drawn work will be conducted under Mrs. T. H. Gibson, beginning Saturday, October 4, at 9:30 a. m. There will be six lessons for \$1. The evening class will begin Thursday, October 2 at 7:30 p. m. and will be conducted by Miss Louise Boardman. These lessons are in embroidery at \$1.

Class in Hawaiian weaving by Miss Rebecca Akana of Kamehameha School beginning Thursday, October 2 at 2:30 p. m. Eight lessons for \$1.

Beginning with Monday, October 13, all those who desire to meet for fancy work at 7:30 p. m. in the association rooms, are cordially invited to do so. There will be no fee for this class.

The outlines for the study of art, issued by the Bureau of University Travel, will be taken up by a class of men and women during the latter part of October. These outlines include special bibliographical notes and suggested readings together with carefully prepared notes on the works of the old masters. For the eight months' course the fee will be \$1.25. The work will be under the supervision of Mrs. Susan D. Heany.

The Camera Club will meet on Thursday evening, October 15, at 7:30 o'clock. Mr. Rice, the photographer, will meet with the club and assist the members by suggestions and directions as to printing. There is no fee attached to the privileges of this class. All members of the association are invited to join.

The Y. W. C. A. gymnasium classes which commence October 1, under the direction of Miss Lillian Bacon, are as follows:

Ladies' Class: Tuesday and Friday, 9:30 a. m., 24 lessons, \$5; with basketball lessons, \$6. Girls' Class: Monday and Thursday, 2:15 p. m., 24 lessons, \$5. Teachers' Class: Saturday, 9:30 a. m., 12 lessons, \$3; with basketball lessons, \$4. Children's Class: Saturday, 10:30 a. m., 12 lessons, \$2.50. Evening Class: Monday, 7:30 p. m., 12 lessons, \$2.50. Business Class: Wednesday, 5 p. m., 12 lessons, \$2.50.

Basketball practice will take place out of doors, the time and place to be arranged later. On alternate Saturday afternoons the physical director will conduct outing expeditions.

RYAN'S OPEN LETTER

Editor Evening Bulletin:—Enclosed please find an open letter to Hon. John M. Thurston. Very truly yours,

T. J. RYAN.
Mountain View, Hawaii,
September 24, 1902.
Hon. John M. Thurston, Honolulu, Hawaii.

Dear Sir:—I have just read the open letter of J. H. Wise directed to you in the (weekly edition) Evening Bulletin and strange as it may appear to you, I myself, and I feel warranted in speaking for at least fifty members of the American Settler's Association, nearly all of whom are Republicans, I would be Republicans on the Mainland and were Republicans before coming to Hawaii but feel it a disgrace to be classed with the so-called Republican party of Hawaii, say:

That I endorse each and every word and sentiment expressed in Mr. Wise's letter. We could find some excuse for President McKinley in appointing Mr. Dole as first Governor of the Territory of Hawaii in view of all the circumstances surrounding annexation, he (Dole) having been the President of the so-called Republic which was in truth and in fact nothing less than an oligarchy with Dole as dictator. If all the foremost Republicans of the Mainland should come here and by its most able and eloquent champions (of which I consider yourself par-excellence) try to persuade us that it is to our benefit, or that it is our duty to join with the so-called Republicans of Hawaii we could only laugh at your ignorance of the vile deeds done, in Hawaii, in the name of the great Republican party of the United States in these islands since annexation. We were shocked, even humiliated, when Governor Dole came back from Washington lately, endorsed by President Roosevelt, to the effect that: "Dole was entitled to the confidence of the administration."

I am confident that Mr. Wilcox will be returned as Delegate to Congress at the coming election; elected (practically) by loyal Republican American citizens in Hawaii as a standing protest against the very things mentioned in Mr. Wise's letter and to show to the world, to the Republican party on the Mainland and to President Roosevelt and his advisers that loyal American citizens and true Republicans refuse to be further disgraced by the continuation of such men as Dole and Cooper at the head of public affairs in Hawaii. From a loyal Republican standpoint I say to you, that it will not take much more such treatment from Republican administrations at Washington to make the Territory of Hawaii as strongly Democratic as is the State of Mississippi. It is just such loyal Republican American white votes that

turned the scale in the last election, and having had no redress of grievances since, will do so again. Mr. Wilcox may or may not be a scholar and a statesman but he is a patriot and a hero as compared with Dole and Cooper. Very respectfully yours,
T. J. RYAN.

WARM COURT SESSION.

Bruce Cartwright, John K. Sumner and R. W. Davis were called as witnesses in the Sumner guardianship case yesterday afternoon. Mr. Cartwright was formerly business agent for Mr. Sumner and Mr. Davis is Mr. Sumner's nephew. The results of the session were mostly objections sustained to questions by George A. Davis and his exceptions to such rulings. He was basing his examination on the record of the trial of a former case and Henry E. Highton for the respondent objected right along. Mr. Davis once corrected the court for addressing Mr. Highton as "Judge," saying, "He never was a Judge." There was much warmth in the proceedings. Mr. Davis once suggested applying to the Supreme Court for a writ of mandamus to compel Judge Robinson to accept the petitioner's evidence as offered.

Naval Progress of the Year Reviewed

Washington, Sept. 14. — A splendid resume of what has been accomplished by foreign navies in the last fiscal year is to be found in "Notes on Naval Progress," made public today by Captain Charles D. Sigbee, Chief of the Naval Intelligence Bureau.

It says in part: "The construction of ships for the fleets of the leading naval powers has gone on actively during the past year, and the new estimates show either an adherence to a well defined program for a steady increase or a desire to make such addition as the present financial condition of the various countries warrant. While there has been no marked change in the design of ships, the tendency has been toward greater displacement in battleships and armored cruisers, better protection and the mounting of guns of the second caliber in a central citadel instead of separating them in casemates."

It is declared that there is urgent need for quick-firing high-power guns well protected by armor of the highest resisting quality, and Cervera's ill-starred rush out of Santiago harbor is cited as a tragic illustration of the dangers of poorly protected gun positions.

Renewed interest in good shooting was displayed in the British Navy the past year. Admirable records have been made by the Terrible and the Banffleur in China, while in the Mediterranean other ships have accomplished excellent results. Practice is now carried on at ranges never before considered for real fighting—5,000 and 7,000 yards. Recent experiments with capped armor-piercing projectiles, it is stated, have demonstrated the value

of the cap as an aid to penetration of armor plates. Experiments have been made in the German navy with a device intended to enlarge the area of action. The device is fitted on the gyroscopic steering gear and makes the torpedo run a straight course for 1,000 meters and then dart on a special or zigzag course, the general direction of which is at right angles to the original flight. The idea is ingenious. A squad of the enemy's war vessels is advancing abreast. The torpedo is aimed at the end vessel on the left. If it misses its target, it then goes flying in and out among the vessels of the entire squadron, with good prospects of leaving its terrible marks. The reports in regard to the utility of the device, it is stated, are conflicting.

Much attention also has been paid during the past year to the subject of liquid fuel firing for marine boilers owing to the recent great discoveries of oil in Texas, California, Japan and Canada and the exploitation of the Borneo and Russian fields. Russia remains the leading exponent of liquid fuel and has exclusively adopted oil firing for her Caspian fleet and partially for her Black Sea fleet. France, Italy, Germany, Holland, Sweden and Great Britain all have been making thorough experiments in this direction.

The engineer officers of all navies, it is said, are watching with keen interest for a decision by the British navy on a permanent type of water-tube boiler. The British Admiralty has ordered a general installation of water-tube boilers in her large fighting craft with a view to learning "the proper generator of energy for the total units of the fleet, those upon which the fate of the nation depends. Primarily, the large battleships and armored cruisers and 'commerce destroyers' that all navies are laying down."

A great future for electricity on board of warships is becoming more and more assured, it is stated, and its adoption is opening up numberless possibilities, chief among the latter being the great military advantage which would be gained by actuating directly from the bridge of the conning tower the propellers of a ship.

"The material progress of the year in wireless telegraphy," it is said, "may be said to be in the matter of length of transmission, in which wonderful advance has been made." But it is pointed out, much less progress was made towards securing immunity of messages from interception, a condition stated to be more important for naval purposes than the length of transmission.

THERE are more Adams-Bagnall Enclosed Arc Lamps used for street lighting throughout the United States, Canada and Mexico, than all other makes of this type of lamp combined.

Thousands of A-B Arc Lamps have been installed in all classes of mills, factories, foundries and retail and wholesale stores throughout the country, and are giving universal satisfaction.
